EXPERIENCE 27 years of R&D management & contributions in advanced computing technologies including scientific **supercomputing** and **quantum computing** spanning national labs, universities, and government. **\$100+ million R&D portfolio administration at national level.** Experience from multiple roles including Manager, Researcher/Scientist, Principal Investigator, Professor, Scrum/Agile Master, Mentor, Advisor, Book Author. Community leadership in professional societies, journal boards, international conferences. Competitive R&D support secured from NSF, DARPA, Air Force, DOE, industry, and others. Technical expertise spanning full software stack, middleware, applications.

BIO SKETCH Kalyan Perumalla is a computer scientist focused on research in **supercomputing, quantum computing, and artificial intelligence**, as **research staff member, faculty, and program manager** with the **U.S. government, national labs, and universities**. He served as a **Federal Program Manager** with a **diverse \$100+M portfolio** in multiple areas and applications in **Advanced Scientific Computing Research (ASCR)**, Office of Science, within the U.S. Department of Energy (DOE). Prior to DOE, he delivered algorithmic and software advancements in supercomputing over **17 years** in research and managerial roles up to **Distinguished Research Staff Member** at the **Oak Ridge National Laboratory (ORNL)**. Prior to that, he held research appointments for **8 years** at **Georgia Tech (GT)**. He was a Fellow of the **Institute of Advanced Study at Durham University, UK**; served as joint full professor in Industrial and Systems Engineering at the **University of Tennessee (UTK)**; and as adjunct faculty at Georgia Tech and the **University of Nebraska (UNL)**. He was elected chair of the **Association for Computing Machinery (ACM)** Special Interest Group in Simulation (**SIGSIM**) for 2020-2024.

CAREER OUTLINE BY BUDGET VOLUME MANAGED

Budget Managed	Period	Institution Affiliations	Roles Fulfilled	Technical R&D Areas	Oversight	Selected Outcomes
\$100+ million	2023-2025	U.S. DOE Office of Science ASCR	Federal Program Manager	Quantum Computing & Networking, HPC/ Supercomputing, AI Scaling & Software, SBIR, SciDAC, Basic Computer Science	50+ PI/Co-PIs (national lab researchers, university faculty & staff, entrepreneurs)	10 funding calls, 3 large PI Meetings, 4 Workshops, 5 Agency Reports
\$10+ million	2010-2022	ORNL, UTK, UNL, ACM, Durham U.	Distinguished R&D Staff, Group Leader, Professor, SIG Chair, Fellow	HPC/Exascale/GPUs, AI, M&S, Reversible Computing, Math Solvers, Cyber-physical Systems, Energy Grid, Transportation, Epidemiology	10+ R&D staff, postdocs, interns, faculty on sabbatical	150+ papers, 5 best paper awards, book, career award, keynotes,
\$1+ million	2000-2009	ORNL, GT	Senior R&D Staff, Adjunct Professor	Reversible Computing, Discrete Event and Agent-based Simulation, HPC, VMs	5+ R&D staff, students	C++/MPI HPC software, demos
\$0.1+ million	1997-1999	GT	Research Faculty Member	Massive Network Simulation, Combinatorial Optimization, Defense Interoperability	5+ students	C++/Java S/W world-wide releases

EDUCATION AND TRAINING

- Ph.D., Computer Science (Georgia Tech), 1999
- M.S., Computer Science (UCF), 1993
- B.E., Mechanical Engineering (Osmania), 1991
- Certified Agile SAFe Scrum Master, Product Owner

PUBLICATIONS AND PRESENTATIONS

- Seminal book on [Reversible Computing](#)
- [150+ articles](#) (journal, conference, books, reports)
- H-index 34 (🔗 [Google Scholar](#))
-  [ORCID](#) |  [IEEE Xplore](#) |  [ACM DL](#) |  [Github](#) | 🌐 kalper.net/kp/pubs
- 100+ presentations, 30+ invited talks, 10+ tutorials

LINKS TO PROJECTS AND SOFTWARE

- [ExaSGD](#), [ReveR-SES](#), [DarkNet](#), [Deep CYBERIA](#), [CYVET](#), [ZeroIn](#), [NetWarp](#), [Kensor](#), [NAERM](#), [HELICS](#), [DTF](#)
- Time Warp, CloneX, GraphGen, usik, BLOCKTRI, and [more](#)

AWARDS

- DOE Early Career Award 2010 (1st cohort of DOE program)
- 5 best paper awards, and 3 best paper finalists; scientific achievement & significant Event awards; R&D100 finalist
- Former [programming contest winner, coach](#)

SCALABLE COMPUTING BACKGROUND

- Distributed, parallel HPC runtimes on **1000s of GPUs, 100,000s of CPU cores**, asynchronous execution systems
- C/C++, MPI, Java, FORTRAN, Python, shell, JavaScript, PHP, MySQL, Rust, Nodejs, React, CUDA, OpenMP, Git, Vi(!), JIRA, Confluence, Spack, Virtual Machines, Hypervisor, Containers, DSLs, Compilers, Linear algebra, differential equation, optimization solvers

CO-AUTHORED/ORGANIZED AGENCY REPORTS/MEETINGS

- ASCR Workshops on Energy-Efficient-, Analog-, and Neuromorphic Computing; QISRC PI Meeting, ASCR CS & Math PI Meetings, SciDAC PI Meeting, and more

I. PROFESSIONAL CAREER OUTLINE

[Kalyan Perumalla](#) is a manager and scientist in advanced computing technologies, with over two decades of experience as research staff member, faculty member, and program manager with the U.S. government, national labs, and universities.

He is currently the founding President of [VIPRA Computing Labs, Inc](#), a startup incorporated in 2026 in the state of Tennessee. Before VIPRA, he served as a Federal Program Manager in the Office of Science at Department of Energy (DOE) headquarters (HQ) in Washington, DC, 2023-2025. Before DOE, he advanced in roles up to a Distinguished Research Scientist at the Oak Ridge National Laboratory (ORNL), 2005-2022. Prior to ORNL, he was a Research Scientist at the Georgia Tech, 1997-2005.

At DOE HQ, he managed a large R&D portfolio totaling over \$100 million covering Artificial Intelligence, High-Performance Computing, Quantum Computing and Networking, Scientific Discovery through Advanced Computing, Basic Computer Science, and SBIR Programs. He contributed to the ideation, formulation, issuance, and management of [12 large solicitations](#), co-organized multiple national workshops and PI meetings, and co-led multiple government agency reports. His major assignments included R&D administration of large, nation-wide projects, a national quantum science center, two quantum testbeds, and the national scientific discovery institute in computer science.

At ORNL, he led advanced R&D for 17 years in roles as line manager, founding group leader, and Distinguished Research Scientist, where he led research in scalable software and scientific applications on the world's largest supercomputers. His algorithms and prototypes have been scaled to thousands of GPUs and 0.2 million cores. He also held a "Top Secret" Security Clearance for classified work.

He was among the first cohort of recipients of the [DOE](#) Early Career Award. Over his career, he has served as PI or co-PI on research projects sponsored by several agencies including the DOE, DHS, Air Force, DARPA, Army Research, NSF, and industry. Dr. Perumalla also held leadership roles as program chair or co-chair of multiple international conferences and served on conference program committees and editorial boards of journals.

He is the author of "[Introduction to Reversible Computing](#)," a seminal book in the fundamental theory and analysis of energy in computation. He also co-authored a book, three book chapters, and about 150 articles in conferences and journals. Five of his papers earned best-paper awards.

In additional service, he held joint and adjunct appointments at Georgia Tech, UT Knoxville, and Univ. of Nebraska. He was selected as a Fellow of the [Institute of Advanced Study](#) at [Durham University](#), UK in 2015. He served as a member of the [National Academies' Technical Advisory Boards](#) for the U.S. Army Research Laboratory. He was elected chair for ACM [Special Interest Group in Simulation](#) 2020-2023.

He earned a bachelor's in mechanical engineering from Osmania University, India, a master's in computer science from UCF, and a Ph.D. in computer science in 1999 from Georgia Tech.

II. PROFESSIONAL EXPERIENCE

A. Appointment Summary

Institution	Title	Type	Grade	Period
VIPRA Computing Labs, Inc. Knoxville, TN 37934	Founder President, CEO	Start-up	Owner	2026-Present
U.S. Department of Energy (DOE) Office of Science (SC)	Advanced Scientific Computing Research	(ASCR)	Executive Branch	2023-2025
19901 Germantown Rd Germantown, MD 20874	Federal Program Manager, Computer Scientist	Full-time		2023-2025
Discrete Computing, Inc.	Founder President, CEO	Start-up	Owner	2022-2023
Oak Ridge National Lab (ORNL) US Department of Energy lab	17 years, Full-time	Research	R&D Staff & Management	2005-2022
ORNL, 1 Bethel Valley Rd, Oak Ridge, TN 37831	Distinguished R&D Staff Member	Full-time	Band 5, S&T E	2014-2022
	Group Leader (Line Manager)	Full-time	Band 5, S&T E	2014-2020
	Senior R&D Staff Member, Team Leader	Full-time	Band 4, S&T D	2010-2014
	Research Staff Member	Full-time	Band 3, S&T C	2005-2010
Georgia Institute of Technology	8 years, Full-time	Research	Professional	1997-2005
Georgia Institute of Technology 801 Atlantic Dr, Atlanta, GA 30318	Academic Professional, College of Computing	Full-time	Junior Faculty	2000-2005
	Research Scientist, College of Computing	Full-time	Variable	1997-2000
Additional Faculty Appointments				
University of Tennessee (UTK) Knoxville, TN 37996	Joint Faculty, Industrial Engineering	Part-time	Full Professor	2020-2022
University of Nebraska (UNL) 301 Peter Kiewit Inst, 1110 S 67 St Omaha, NE 68182	Adjunct Professor, Electrical Engineering	Affiliation	Courtesy Appointment	2021-2022
Georgia Institute of Technology 801 Atlantic Dr, Atlanta, GA 30318	Adjunct Professor, Comp. Sciences & Engg.	Affiliation	Courtesy Appointment	2006-2022
Durham University, Stockton Rd, Durham, DH1 3LE, UK	IAS Fellow, Inst. of Adv. Studies	Sabbatical	International Cohort	2014-2015
Bellcore, Morristown, NJ	Intern, Consultant	Full-time	Grant	1995, 1996
Schlumberger, Tulsa, OK	Intern	Full-time	Stipend	1994
Institute for Simulation & Training Orlando, FL	Software Developer, Semi-automated Forces	Part-time	Student	1991-1993
University of Central Florida 4000 Central FL Blvd, Orlando, FL	Teaching Assistant, Computer Science	Part-time	Student	1991-1993

B. Recent R&D Portfolio and Program Management

Federal US DOE Program Manager

Feb'23 to Sep'25, managed R&D portfolio with total budget exceeding **\$100 million**

Selected Large Projects, Centers, and Thrusts managed as Program Manager

Period	Program Area Managed	Institutions (leads)	Budget Authority
4/24 to 2/25	AI-for-Science–Systems: Research Software (FY24-27)	Lawrence Livermore National Laboratory, Oak Ridge National Laboratory	\$4 million/year
4/24 to 2/25	NQISRCs – National Quantum Information Science Research Centers (FY20-25)	Quantum Science Center (QSC) led by Oak Ridge National Laboratory, one of five NQISRCs	\$25 million/year
3/23 to 2/25	Quantum Networking (FY23-26)	Argonne National Laboratory, Fermi National Laboratory Lawrence Berkeley National Laboratory, Oak Ridge National Laboratory;	\$10+ million/year
4/24 to 2/25	Quantum Testbeds (FY21-26)	AQT (Lawrence Berkeley National Laboratory); QSCOUT (Sandia National Laboratory)	\$6+ million/year
11/23 to 2/25	SciDAC – Scientific Discovery with Advanced Computing (FY20-25)	SciDAC Institute (Computer Science) RAPIDS (led by Argonne National Laboratory)	\$6+ million/year
7/24 to 2/25	Competitive Portfolios Computer Science Thrusts (FY24-29)	Lawrence Berkeley Laboratory, National Energy Technology Laboratory, Oak Ridge National Laboratory	\$6 million/year
09/24- 2/25	EXPRESS – Exploratory Research in Extreme-Scale Science (FY24-27)	Argonne National Laboratory, Los Alamos National Laboratory, University of Michigan	\$1.5 million/year
02/23	SBIR – Small Business Innovation Research (FY23-26)	Phase I and Phase II awards to commercial entities on multiple topics including AI, Digital Twins, Quantum Computing & Networking, High-Performance Computing	Several grants to businesses

Solicitations authored or co-authored

	FY	Call#	Solicitation Title	Link	Budget Authority
1	2025	LAB-25-3510	Scientific Discovery through Adv. Computing (SciDAC) Institutes	Site , PDF	\$75 million
2	2025	LAB-25-3530	National Quantum Information Science Research Centers	PDF	\$625 million
3	2025	LAB-25-3520	Competitive Portfolios for Advanced Scientific Computing Research	PDF	\$35 million
4	2025	DE-FOA-0003545	Exploratory Research for Extreme-Scale Science (EXPRESS)	PDF	\$16 million

5	2025	DE-FOA-0003450	Early Career Research Program	Site, PDF	\$136 million (8 offices)
6	2025	DE-FOA-0003432	Continuation of Solicitation - Office of Sci. Financial Assistance Program	Press, PDF	\$500 million (8 offices)
7	2024	DE-FOA-0003264	Advancements in Artificial Intelligence for Science (AI for Science)	Press, Awards, PDF	\$68 million for 11 large projects, 43 awards
8	2024	LAB-24-3210	Competitive Portfolios for Advanced Scientific Computing Research	Press, Awards, PDF	\$87 million for 9 awards
9	2024	DE-FOA-0003280	Reaching a New Energy Sciences Workforce (RENEW)	Press, Awards, PDF	\$36 million for 29 projects, 16 states, 42 institutions
10	2024	DE-FOA-0003300	Exploratory Research for Extreme-Scale Science (EXPRESS)	Press, Awards, PDF	\$10.8 million for 19 projects
11	2023	LAB-23-3040	Scientific Enablers of Scalable Quantum Communications	Press, Awards, PDF	\$24 million for 3 large projects

Meetings, Workshops and Reports Organized/Co-organized

Event	Year	Website	Information
ASCR Workshop on Energy-Efficient Computing, Washington, DC	2024	https://www.ornl.gov/2024/EEWorkshop	100+ researchers from national labs and universities
ASCR Workshop on Analog Computing, Washington, DC	2024	https://www.ornl.gov/2024/AnalogComputingWorkshop	Report DOI/Biblio Brochure DOI/Biblio
ASCR Workshop on Neuromorphic Computing, Washington, DC	2024	https://www.ornl.gov/2024/NeuromorphicComputing	
DOE National Quantum Information Science (QIS) Research Centers PI Meeting, Washington, DC	2024	https://science.osti.gov/Initiatives/QIS/Community-Resources/PI-Meetings	100+ PI/Co-PI researchers from 10+ national labs and several universities
ASCR Computer Science PI Meeting, Atlanta, GA	2024	https://www.ornl.gov/2024/CSPI	100+ PI/Co-PI researchers from 10+ national labs and several universities
DOE SciDAC-5 PI Meeting, Washington, DC	2024	Website , Summary	100+ PI/Co-PI researchers from 10+ national labs and several universities
ASCR Workshop on Basic Research Needs in Quantum Computing and Networking, Washington, DC	2023	https://www.ornl.gov/ASCR-BRN-Quantum	Report DOI/Biblio Brochure DOI/Biblio Position Papers DOI/Biblio

C. Work Details

- **VIPRA Computing Labs, Inc, Knoxville, Tennessee, USA** **2026-Present**
Founder and President
 - Founder of new startup incorporated in the state of Tennessee, focusing on advanced computing solutions <https://vipracomputing.com>, contact@vipracomputing.com
- **U.S. Department of Energy, Germantown, Maryland, USA** **2023-2025**
Program Manager <https://science.osti.gov/ascr/Research/Computer-Science>
 - **Portfolio:** Federal Program Manager with diverse technical portfolio including quantum computing and networking, high-performance computing (HPC), supercomputing, artificial intelligence (AI), scientific discovery through advanced computing (SciDAC), and basic computer science research, small business innovation research (SBIR). In his **\$100-million R&D portfolio** at DOE/ASCR, he contributed to the ideation, formulation, issuance, and management of **12 large solicitations**. His major assignments included R&D administration of:
 - [Quantum Science Center \(QSC\)](#) (\$25 million/year), one of the five [national quantum information science research centers \(NQISRCs\)](#)
 - [Advanced Quantum Testbed \(AQT\)](#)
 - [Quantum Scientific Computing Open User Testbed \(QSCOUT\)](#)
 - SciDAC Computer Science Institute ([RAPIDS2](#))
 - Computer Science segment of the Base Program (Competitive Portfolios)
 - Artificial Intelligence (AI) for Science (Scientific Software); and
 - Several Phase I and Phase II projects under the Small Business Innovation Research Program in Artificial Intelligence, Digital Twins, Quantum Computing and Networking, and Combinatorial Optimization.
 - **Responsibilities:** identification, ideation, formulation, and official solicitation of research and development projects, and the awarding processes and management of multi-year awards to institutions including universities, national laboratories and industry across the nation. Organizing large workshops on basic research needs, large principal investigator (PI) meetings, steering expert panels for science and technology roadmaps, identifying priority research directions, drafting R&D solicitations, assembling and conducting review panels, performing expert/peer reviews and ratings, making selection recommendations with formal justifications, initiating and administering awards, monitoring and evaluation of progress, delivering guidance,

initiating and approving modifications, extracting highlights, and other activities in multi-year R&D workflows.

- **Achievements:** Led the establishment of a world-class quantum networking program at ASCR for advancing science and technology in scalable quantum networking devices, architectures, and protocols. Released 10 large funding solicitations in two years as lead or co-lead program manager. Helped launch investments in artificial intelligence through competitive funding opportunities to support national labs, universities, and commercial businesses. A new base program in computer science was launched, combined with a restructuring of the applied mathematics base program. Also oversaw the Quantum Science Center, one of the National Quantum Information Science Research Centers, as well as two quantum computing testbeds. In a new re-competition phase for institutes in the SciDAC program, played instrumental role in the redefinition of the vision of institutes, accommodating a large number of critical factors in the changing landscape of high-end computing. Co-organized several PI meetings and basic research needs workshops to engage the national research communities in charting the course for next investment and identifying priority research directions and opportunities.
- **Discrete Computing, Inc, Knoxville, Tennessee, USA** **2022-2023**
Founder, President and CEO
 - Founder of new startup corporation focusing on “advanced computing solutions”
<https://discretecomputing.com>, contact@discretecomputing.com
<https://linkedin.com/company/discrete-computing-inc>
- **Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA** **2014-2022**
Distinguished R&D Staff Member, Computing & Computational Sciences Directorate.
 - Responsibilities include initiation, planning and managing major research programs or projects; broad responsibility guided by unit goals, policies, procedures and strategy; exercise of considerable latitude in determining objectives and approach to work assignments; influences top management in determining unit goals and objectives; performance of work managed by results; development of new client relationships; management of full range of research services in most complex problems; competence with all standard and advanced equipment, systems, policies and work methods; maintenance of international reputation for knowledge in speciality; establishment of track record in pushing the edge of knowledge; advanced knowledge of wide range of principles, theories, professional competencies and research methods; advanced knowledge of other disciplines and functions; handling most complex, diverse and impactful problems with original solutions and integration/coordination of disciplines, functions and staff; application of considerable judgement and professional competency; and achievement and maintenance of reputation as key contributor to major programs; externally recognized expertise in one or more fields.
- **University of Tennessee, Knoxville, Tennessee, USA** **2020-2022**
Joint Full Professor, School of Industrial Systems and Engineering.
 - Research and development, projects, advising and supervision of students.
- **University of Nebraska-Lincoln, Omaha, Nebraska, USA** **2021-022**
Adjunct Professor, Department of Electrical and Computer Engineering.
 - Research and development, advising students.

- **Georgia Institute of Technology, Atlanta, Georgia, USA** **2006-2022**
Adjunct Professor, School of Computational Sciences and Engineering.
 - Research and development, advising students.
- **Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA** **2014-2020**
Group Leader, Discrete Computing Systems Group, Computer Science and Mathematics Division, Computing and Computational Sciences Directorate.
 - Founded the group; formulated its vision and mission; designed its strategic plan, analysis of technical strengths, weaknesses, opportunities and threats; maintain human capital management plans
 - Regular responsibilities include personnel performance evaluations/appraisals and development plans; promotion processes, salary recommendations; time entry and accounting; budget preparation and tracking; absence policies; oversight of administrative assistants; interaction with human resources personnel; incentivizing with avenues such as significant awards; sensitivity to legal, programmatic, personal, and technical considerations; procurement and purchasing; travel and project approvals; ergonomics and safety compliance; hosting visitors; recruitment, interviewing, and external representation; and several others.
- **Durham University, Durham, UK** **2015**
IAS Fellow, Fellow at the Institute of Advanced Study (IAS): Performing interdisciplinary research in the Epiphany term under the theme Emergence.
- **Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA** **2009-2014**
Senior R&D Staff Member, Computational Sciences and Engineering Division, Computing & Computational Sciences Directorate.
- **Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA** **2010-2014**
R&D Manager and Team Lead, Computational Sciences and Engineering Division, Computing & Computational Sciences Directorate.
- **Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA** **2005-2008**
Research Staff Member, Computational Sciences and Engineering Division, Computing & Computational Sciences Directorate.
- **Georgia Institute of Technology, Atlanta, Georgia, USA** **2000-2005**
Research Faculty Member, College of Computing: Advised graduate students, supervised research assistants, taught senior undergraduate course, obtained externally sponsored research funding, served as co-PI on multiple projects, performed collaborative research within as well as outside Georgia Tech.
- **Georgia Institute of Technology, Atlanta, Georgia, USA** **1997-2000**
Research Scientist. Performed research in large-scale network modeling, high-performance simulation, compilers and Department of Defense (DoD) High Level Architecture (HLA) federations.
- **Georgia Institute of Technology, Atlanta, Georgia, USA** **1993-1997**
Graduate Research Assistant. Researched Asynchronous Transfer Mode (ATM) network simulation and parallel simulation.
- **Bellcore, Morristown, New Jersey, USA** **Summer 1996**
Consultant. Researched formal specification, modeling & simulation systems for wired

& wireless networks; modeled large ATM Private Network-Network Interface (PNNI) networks.

- **Bellcore, Red Bank, New Jersey, USA** **Summer 1995**
Intern. Researched performance evaluation techniques for ATM networks.
- **Schlumberger, Tulsa, Oklahoma, USA** **Summer 1994**
Intern. Designed and developed network communication and visualization software for real-time data from oil exploration devices.
- **Institute for Simulation and Training, Orlando, Florida, USA** **1992-1993**
Developer. Team member for DoD Computer Generated Forces in distributed interactive (JSAF) battlefield simulation. Developed intelligent behavior for simulated tanks & soldiers. Investigated aggregation & disaggregation of entities.
- **University of Central Florida, Orlando, Florida, USA** **1991-1992**
Graduate Teaching Assistant. Taught sophomore-level computer programming class: teaching, preparing exams, grading exams and lab work.

III. EDUCATION

A. Academic

- **Ph.D., Computer Science** **December 1999**
Georgia Institute of Technology, Atlanta, Georgia, USA
Thesis Title: "Techniques for Efficient Parallel Simulation and their Application to Large-Scale Telecommunication Network Models"
Advisor: Dr. Richard Fujimoto
- **M.S., Computer Science** **June 1993**
University of Central Florida, Orlando, Florida, USA
Thesis Title: "A Debugging Environment for the Parallel Virtual Machine (PVM)"
Advisor: Dr. Udaya Vemulapati
- **B.E., Mechanical Engineering** **May 1991**
Osmania University, India
Thesis Title: "Interactive Computation of the Critical Path Method"

B. Management Training

- **"Courageous Leaders" Program** **July 2020**
Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA
Summit program designed as comprehensive and insightful training for inclusive leadership, awareness of insider culture, and specific actions. Skills to identify next steps in leadership. Training offered by WMFDP Global.
- **"Developing Leadership Potential (DLP)" Program** **March-July 2016**
Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA
Program Overview: Curriculum designed to address advanced leadership needs in career development, personal strengths & challenges, leadership communication strategies, networking, senior leader expectations. Uses a variety of methods and venues to enhance ongoing learning and application. Provides support through networking, interaction with senior leaders, individual coaching and personal assessments.
Designed for: Individuals who are in a leadership role, have completed

Management Boot Camp, seek to grow his/her leadership abilities, and are identified as a high potential individual and as a potential successor for a higher level role.

- **“Management Boot Camp: Skills for Managers”** *February 2011*
American Management Association, Oak Ridge, Tennessee, USA
Coverage: Effective Communication, The Art of Influencing Others, Coaching for Performance, Motivation, Delegating for Growth and Development, Institutional Planning and Integrated Performance Management, Facilities and Space, Employee Recruitment, Strategic Planning and Execution, Time Keeping, Finance Fundamentals, Employee Discipline, Employee Performance Management
- **“Project Management Training,” “Unconscious Bias,” “Sexual Harrasment in Workplace”** and other training at Oak Ridge National Laboratory.

C. Agile Development Training

- **Certified Scaled Agile (SAFe) Practitioner**
The Scaled Agile Framework (www.scaledagileframework.com)
- **Certified Scrum Master**
The Scrum Alliance for Scrum and Agile (www.scrumalliance.org)
- **Certified Scrum Product Owner**
The Scrum Alliance for Scrum and Agile (www.scrumalliance.org)
- **Certified Scrum-at-Scale Practitioner**
The Scrum Alliance for Scrum and Agile (www.scrumalliance.org)

IV. RECOGNITION

A. Fellowships

- **Durham IAS Fellow**, awarded a research fellowship from a worldwide selection process, at the Institute of Advanced Study (IAS), Durham University, United Kingdom; fellowship period December 2014-March 2015 (with full financial support by the fellowship).

Completed a [collaborative engagement](#) on Durham campus with [7 fellows](#), under the “[Epiphany term](#)” theme *Emergence*. Interdisciplinary cohort of fellows spanned philosophy, art, anthropology, history, and economics.

B. Service Appointments

- **ACM SIG Governing Board Member** ([SIG Governance](#)) as elected chair of the Association for Computing Machinery Special Interest Group in Simulation (SIGSIM) (<https://www.acm.org/special-interest-groups/sig-governance>) for term starting July 1, 2020.

Nominated on the slate in April 2022 for Member-at-Large position in the ACM SIG Governing Body.
- **Member of National Academy of Sciences’ Panel** for Assessment of Computational Science at the US Army Research Laboratory, 2017.

Served on the panel on Aberdeen Proving Grounds campus to review the computational science research programs and projects at the ARL. Contributed as co-author to a detailed assessment of research documented in a [panel report](#) published by the National Academies.

- **Member of National Academy of Sciences' Panel**, appointed for a two-year term as panel member on Information Science at the US Army Research Laboratory, 2015–2017.

Served on the panel on Aberdeen Proving Grounds and Adelphi campuses to advise on information science research directions of the ARL. Contributed as co-author to a detailed assessment of research documented in a [panel report](#) published by the National Academies.

C. Awards

- **Division's Significant Technical Contribution Award**, "*in recognition of the most Significant Technical Contribution by Advancing the Field of Reversible Computing*," Computer Science and Mathematics Division, Oak Ridge National Laboratory, December 2017.
- **Division's Best Publication Award**, Computational Sciences and Engineering Division, Oak Ridge National Laboratory, July 2014.
- **Best Paper Award Winner**, lead author, paper on *Simulating Billion-Task Parallel Programs* in the SCS Summer Simulation Conference, International Symposium on Performance Evaluation of Computer and Telecommunication Systems, July 2014.
- **Best Paper Award Finalist**, co-author, paper on *Efficiently Scheduling Multi-core Guest Virtual Machines on Multi-core Hosts in Network Simulation* in the ACM/IEEE/SCS Workshop on Principles of Advanced and Distributed Simulation, July 2011.
- **Best Paper Award Finalist**, lead author, paper on *Reversible Parallel Discrete Event Execution of Large-scale Epidemic Outbreak Models* in the ACM/IEEE/SCS Workshop on Principles of Advanced and Distributed Simulation, June 2010.
- **Best Paper Award Finalist**, lead author, paper on *Agent Simulations on Multi-GPU and Multi-Core Clusters* in the ICST International Conference on Simulation Techniques and Tools, March 2010.
- **DOE Career Award Winner, FY 2010-2015, ReveR-SES: Reversible Software Systems**, announced January 2010
 - Selected from a national pool of over 2200 pre-proposals and over 1500 proposals
 - **One of only two awarded for research in advanced scientific computing to national laboratories in the inaugural year of the program (2010).**
- **Best Paper Award Winner**, co-author, paper on *Agent Simulations on GPUs* in the SCS Spring Simulation Multi-Conference, April 2008.
- **Significant Event Award**, "Largest and Fastest PDES Executions on the Blue Gene Supercomputer," Oak Ridge National Laboratory, September 2007, recognized by the Associate Laboratory Director (Thomas Zacharia).
- **Best Project Poster Winner**, member of team led by John Stovall in the "Electric Grid Real-time Monitoring & Visualization" project, among Oak Ridge National Laboratory-Directed R&D projects of 2003-2006, November 2006, recognized by the Laboratory Director (Jeffrey Wadsworth).
- **Best Paper Award Winner**, co-author, paper on *Plasma Simulations* in the ACM/IEEE/SCS Workshop on Parallel & Distributed Simulation, June 2005.

- **Best Paper Award Winner**, co-author, paper on *Updateable Simulation* in the ACM/IEEE/SCS Workshop on Parallel & Distributed Simulation, May 2002.
- **Best Paper Award Winner**, co-author, paper on *Reverse Computation* in the ACM/IEEE/SCS Workshop on Parallel & Distributed Simulation, May 1999.
- **Contest Winning Teams and Honorable Mentions**, Programming team coach, Georgia Tech: Coached ACM programming teams 1993-2000. Teams placed 1st among 60-70 teams in ACM Southeast Regional Programming Contests in 1994, 1998 and 1999. Team placed 10th in 1995 World Finals. Teams placed 1st in IBM Java Challenge 1999 and 2000.
- **Programming team member**, University of Central Florida: Team placed 2nd in the ACM Southeast Regional Programming Contest, 1992.

D. Additional Award Nominations

- **R&D100 Award Finalist**, "*HELICS: Hierarchical Engine for Large-scale Infrastructure Co-Simulation*," with other DOE labs led by PNNL, April 2019.
- **UT-Battelle Awards Night**, nominated four consecutive years (2010-2013) as the best division-level candidate from the Computational Sciences and Engineering Division (out of ~150 research staff members), Oak Ridge National Laboratory, in the category of scientific research.

V. EXTENDED OUTREACH ACTIVITIES

- **Judge:** Served/serving multiple venues over the years; recently on judging panel of doctoral consortium and poster judging teams at the **Tapia Conference in Computing** 2018, 2019, 2020, 2021, 2022, 2026.
- **Sponsor and Recruitment Representative:** Represented ORNL as a major sponsor of the CRA-WP Graduate Cohort for Underrepresented Minorities and Persons with Disabilities (URMD) Workshop.
- **Mentor of GEM Fellows:** Sponsored and mentored nationally selected fellows in the GEM Fellowship Program (National Graduate Degrees for Minorities in Engineering and Science, Inc.).
 - **Kingsley Nwosu (2021):** Machine Learning and Artificial Intelligence applied to Cyber-physical Systems
 - **Cora Chanel Richardson (2021):** Quantum Optimization and Reversible Computing applied to Electric Grid Resilience
 - **Alejandro Vega Nogales (2019):** Machine Learning techniques applied to Cyber-physical Systems
- **Sponsoring Africa-WiC:** Championed the sponsorship (at Platinum Level) of the 2022 Conference of ACM Women-in-Computing in Africa (first annual celebration).

VI. SPONSORED RESEARCH AND DEVELOPMENT

A. Funded Research Projects

- **PI (ORNL), Office of Electricity** “DarkNet Cyber Resilience,” (\$1.5million) 2022-2023.
- **PI (ORNL), Exascale Computing Program (ECP), Department of Energy** “ExaSGD: Stochastic Grid Dynamics at Exascale,” (\$1.9million of \$8million) 2019-2023.
- **PI (UTK), Silicon Valley Community Foundation** “Advancing Software Security from the Very Origin via Novel Graph-Based Machine Learning,” (\$400K) 2021-2024.
- **Co-PI (ORNL), Air Force** “Deep CYBERIA: Cyber Operations Capabilities Development, Design and Analysis,” (\$5.2million) 2020-2023.
- **Co-PI (ORNL), Office of Cybersecurity, Energy Security, and Emergency Response, Department of Energy** “CYVET: A Cyber-physical Assurance Framework based on a Semi-Supervised Vetting Approach,” (\$3million) 2019-2022.
- **Co-PI (ORNL), Office of Electricity, Department of Energy** “A New Approach to Transient Analysis for Smart Power Systems,” (\$400K) 2019-2021.

- **Co-I (ORNL), Hydro Power Technologies Office, Department of Energy** “Needs Assessment and Initiation of a Digital Twin for Hydropower Systems Open Platform Framework,” (\$550K seed for a large ORNL team) 2020-2021.
- **PI (ORNL), Missile Defense Agency – STTR Scalable Network Technologies Inc.,** “Secure Environment for Cyber Resiliency Evaluation of Missile Defense Systems,” (\$37K) 2020-2021.
- **Co-PI (ORNL), Oak Ridge National Laboratory Directed Research and Development** “Deep CYBERIA: Application of Digital Twin Techniques to Operational Assets,” (\$800K) 2018-2020.
- **Co-PI (ORNL), National Science Foundation – NSF Expeditions** (no-cost collaboration with U. Virginia-led multi-institutional team) “Global Pervasive Computational Epidemiology,” 2020-2025.
- **Area-Lead (ORNL), Office of Electricity, Department of Energy** “North American Energy Resilience Model,” Software Architecture Team Lead, (\$750K of \$6million) 2019-2020.
- **Co-PI (ORNL), Oak Ridge National Laboratory Seed Money** “Automated Intelligent Generative Design for Scientific and Engineering Applications – Heat Exchanger,” (\$190K) 2018-2020.
- **PI (ORNL), US Department of Energy** “Development of Integrated Transmission, Distribution, and Communication (TDC) Models [Grid Modernization Laboratory Consortium (GMLC)],” with PNNL (lead) and LLBL, NREL, ANL, SNL and INL, (\$600K for ORNL) 2016–2019.
- **Co-PI (ORNL), Oak Ridge National Laboratory Directed Research and Development** “Rapid Digital-Twin Development Framework for Quantitative Assessment of Grid Cyber Resilience,” (\$1.4million) 2018.
- **Co-PI (ORNL), A sponsor from the Intelligence Community** “Fast Detection Algorithms for Parallel Execution using DLIB on GPUs,” (\$60K) 2017-2018.
- **Co-PI (ORNL), A sponsor from the Intelligence Community** “High Performance Algorithms and Optimization of Image Registration Workloads on Multi-GPU, Multi-Core, and Mobile Platforms,” (\$400K) 2016-2018.
- **PI (ORNL), US Department of Energy** “ReveR-SES: Reversible Software Execution Systems,” (\$2.5million) 2010–2015, DOE/ASCR Early Career Award.
- **PI (ORNL), Oak Ridge National Laboratory Directed Research and Development** “CloneX: Discrete Event Cloning at Exascale,” (\$730K) 2014–2016.
- **PI (ORNL), Department of Defense (US Army Research Laboratory)** “NetWarp-Frontline: VM/Cloud-based Discrete Event Simulations for military MANETs,” (\$300K) 2012–2013.
- **PI (ORNL), Caterpillar Inc.** “Rocks3D-HPC,” (\$300K) 2011–2012.
- **PI (ORNL), Department of Defense (US Army Research Laboratory)** “Design of Discrete-Event Testbed for Systems Effects in Defense Communications,” (\$300K) 2011–2012.
- **PI (ORNL), Oak Ridge National Laboratory Directed Research and Development** “Runtime Infrastructures for Discrete Event Execution at Peta-scale and Beyond,” (\$700K) 2009–2011.
- **PI (ORNL), Oak Ridge National Laboratory Program Development** “High-Performance Discrete Computing Systems,” (\$28K) 2008–2009.

- **PI (ORNL), US Department of Homeland Security/Southeastern Regional Research Initiative** “RealSim: HPC and Data-Enabled Solutions to Critical Applications,” (\$960K) 2007-2008.
- **Co-PI (ORNL), Oak Ridge National Laboratory Program Development** “Large-scale Simulation and Bio-Medical Technologies,” (\$20K) 2007–2008.
- **PI (ORNL), Oak Ridge National Laboratory Program Development** “High-Performance Parallel Discrete Event Technologies,” (\$30K) 2006–2007.
- **Co-PI (ORNL), National Geo-Spatial Intelligence Agency** “An Agile and Error-Resilient GIS Database Architecture for Uncertainty Management,” (\$850K) 2006-2008.
- **PI (ORNL), Oak Ridge National Laboratory Directed Research and Development** “An Evolutionary Approach to Porting Applications to Peta-Scale Platforms,” (\$650K) 2006–2009, LDRD 07-024.
- **PI (ORNL), Oak Ridge National Laboratory Program Development** “Infrastructure Testbeds for High Performance Platforms,” (\$8K) 2006–2007.
- **Co-PI (ORNL) (*joined subsequent to funding*), Oak Ridge National Laboratory Directed Research and Development** “Real-Time, Interconnection-Wide Power System Analysis & Visualization,” (\$450K) 2005–2006, LDRD 05-015.
- **Co-PI (Georgia Tech), US National Science Foundation Information Technology Research** “Collaborative Research: ITR: Global Multi-scale Kinetic Simulations of Earth’s Magnetosphere using Parallel Discrete Event Simulation,” (\$1.3million) 2003–2006, ATM-0326431 (Georgia Tech).
- **Co-PI (Georgia Tech), US Defense Advanced Research Projects Agency** “Backplane-based Network Simulation & Emulation,” (\$780K) 2004-2005.
- **Co-PI (Georgia Tech), US Defense Advanced Research Projects Agency Network Modeling & Simulation (NMS) Program** “A Backplane Approach to Flexible, Efficient Network Emulation,” (\$1.6million) 2000–2003, N66001-00-1-8934.
- **Co-PI (Georgia Tech) (*joined subsequent to funding*), US Defense Advanced Research Projects Agency Next Generation Internet (NGI) Program** “Scalable Self-Organizing Simulations,” (\$400K) 1996–1999, N66001-96-C-8530.
- **Co-PI (Georgia Tech) (*joined subsequent to funding*), US National Science Foundation** “Simulation of Integrated Communication Systems,” (\$200K) 1995–1998, NCR-9527163.

B. Other Unfunded Large Proposals

- **PI (ORNL), Israel-US Energy Foundation** “Distributed Energy Asset Early Warning System,” (\$23.5million) 2020-2025, with Elta, SIGA and Siemens.
- **Co-PI (ORNL), Advanced Scientific Computing Research, Department of Energy** “MAIDS: Meta-level AI Decision System to Steer ML-Accelerated Large-scale Scientific Simulations,” (\$2.5million) 2020-2023.
- **Co-PI (ORNL), National Virtual Bio-Technologies Laboratory, Department of Energy** “Epidemiology Modeling in Support of Response Planning,” (\$400K of \$1.9million led by LBNL) 2020-2021.

- **PI (ORNL), Office of Electricity, Department of Energy** “Simulation-based Optimization of Relay Settings in Large-scale Electric Grids,” (\$400K) 2020-2021.
- **Co-PI (ORNL), Office of Electricity, Department of Energy** “Edge Computing Infrastructure using Application-Specific Programmable System-on-Chip to Process Large Datasets,” (\$530K) 2020-2021.
- **PI (ORNL), Hydro Power Technologies Office, Department of Energy** “Towards Holistic Evaluation of Hydropower Cybersecurity,” (\$700K) 2020-2022.
- **Co-PI (ORNL), Intelligence Community** “[A Proposal on Image Processing],” (\$1.2million) 2016.
- **PI (ORNL), US Department of Energy** Advanced Scientific Computing Research, FOA-1059, “Resiliency in Extreme Scale Computing Platforms: Anomaly Detection and Fault Avoidance Via Real-time Learning,” (\$3million) 2015–2018.
- **PI (ORNL), US Department of Energy** Advanced Scientific Computing Research, LAB14-1088, “RX – Tools for Reconciling Reality-vs-Expectation in Extreme-scale Computing,” (\$1million) 2014–2016.
- **PI (ORNL), US Department of Energy** Advanced Scientific Computing Research, “NetWarp: High-fidelity Experimentation Environments for Analysis of Rapidly Evolving Software,” (\$1.5million) 2009–2012, with Lawrence Livermore National Laboratory.
- **PI (ORNL), US Defense Advanced Research Projects Agency** National Cyber Range (NCR) Program, “ORANGE-Net: A Real-Time Resilient and Scalable System for National Cyber Range,” (\$2million) 2008–2009, with Microsoft Inc., and NASA Jet Propulsion Laboratory.
- **PI (ORNL), US National Science Foundation** PetaScale Applications (PetaApps) Program, “Petascale Simulation of Large-Scale Transportation Cyberinfrastructure,” (\$600K) 2008–2012, with Georgia Tech and SNT Inc.
- **PI (Georgia Tech), US National Science Foundation** Networking Technologies and Systems (NeTS) Program, “Design of Sensor Networks using Constraints-based Specification and Simulation,” (\$900K) 2005–2008, with RPI and SUNY Stony Brook.
- **PI (Georgia Tech), US National Science Foundation** Formal and Mathematical Foundations (FMF) Program, “Real-time and Best-effort Solutions of Mixed Integer Programs,” (\$900K) 2004–2007, with Georgia Tech, Lehigh University, and University of Wisconsin.

C. Supercomputing Allocations

- **Titan**, 2012 (PI): “ReveR-SES: Reversible Software Execution System for Ultra-scale Computing,” 2,000,000 hours (CSC088) on the Titan supercomputer at the Oak Ridge Leadership Computing Facility, National Center for Computational Sciences, Oak Ridge National Laboratory
- **Jaguar**, 2010 (PI): “Data and Runtime Infrastructure for Parallel Discrete Event at Petascale,” 500,000 hours (CSC034 #2) on the Jaguar supercomputer at the Oak Ridge Leadership Computing Facility, National Center for Computational Sciences, Oak Ridge National Laboratory
- **Jaguar**, 2007 (PI): “An Evolutionary Framework for Porting Applications to Petascale Platforms,” 150,000 hours (CSC034 #1) on the Jaguar supercomputer at the Oak Ridge Leadership Computing Facility, National Center for Computational Sciences, Oak Ridge National Laboratory

- **Participant:** Allocations in other projects spanning multiple areas including deep learning and non-linear optimization.

VII. SOFTWARE ARTIFACTS

<i>Package</i>	<i>Description</i>	<i>Impact</i>
Deep CYBERIA	Novel software system to detect, identify, correlate, and visualize sensors beyond network-reachable cyber surface; research in transition to Air Force	■ Deployment package using WireShark, PyShark, Python, gephi, CRViz, Docker, VMWare VM, Node.js, React.
CYVET	Novel natural language processing for semi-automated cybersecurity vetting (TallyVet, TestVet, CYBERT)	■ Applied to actual electric grid utility operator cyber-physical systems using multiple ML & NLP tools incl. BERT.
ExaCorona	Scalable generator of simulated datasets for COVID and similar pandemics, aimed at three dimensions of scalability	■ Runs on Linux, MacOS, and Summit Supercomputer.
CloneX	Fast what-if decision ensemble analyzer, scaling to millions of scenarios; scales out to 1000s of GPUs (tested on 8192 GPUs)	■ Applied to forest fires, epidemiological scenarios at country scale; largest and fastest meso-scale simulator.
MutEnt	Novel mutual entropy computation code for highly scalable and efficient computation of image registration operations for large sized, high-volume images.	■ Runs on CPU and GPU platform (C++, CUDA) ■ Beats the best-known open-source implementations available in OpenCV.
DeepEx	Manager for novel ORNL code for Deep Learning designed for very light software footprint, scaling to large heterogeneous platforms (GPU and multicore CPU), highly portable compiled implementation for high performance.	■ Runs on supercomputing platforms with GPUs and CPUs (C++, MPI, CUDA – CUDNN, NCCL) ■ Tested on several networks (VGGNet, etc.), and image data sets.
RBLAS	Reversible version of basic linear algebra subprograms (BLAS) interface and implementation that works over traditional (irreversible) BLAS.	■ The only available reversible linear algebra library. Portable across GPUs and CPUs (C, C++, FORTRAN, CUDA).
μπ (MUPI)	The world's most scalable simulator of Message Passing Interface (MPI) programs.	■ Tested on up to 216,000 processor cores of Cray XT5; supports over 227 million virtual tasks.
BLOCKTRI	Scalable block tri-diagonal solver using block cyclic reduction algorithm; one of the fastest and most scalable implementations using standard MPI and FORTRAN; developed from the ground up depending only on native BLAS library.	■ Used by fusion energy simulations (tokamak and stellarator equilibrium codes), and astrophysics codes. Runs on thousands of CPU cores.
libSynk	Library for high performance time-synchronized communication on distributed memory platforms; written in C, over sockets, MPI & shared memory.	■ Employed by leading distributed network simulators including <i>pdns</i> , <i>DaSSF</i> & <i>GTNetS</i> .

μsik	Novel PDES “micro-kernel”, unifying most existing virtual time-synchronization techniques; written in C++.	■ Designed for scalable Time Warp as well as conservative synchronization on 216,000 processor core execution ■ Being applied to large-scale space physics DES models, neurological simulations and others.
TeD	Domain Specific Language and compiler for automated Time Warp-based execution of network models. www.cc.gatech.edu/computing/pads/teddoc.html	■ Precursor to leading parallel/distributed network simulators ■ Widely disseminated world-wide and well cited in the literature.
FDK <i>Co-author</i>	High-performance realization of the Department of Defense High Level Architecture (HLA) Runtime Infrastructure (RTI) www.cc.gatech.edu/computing/pads/fdk.html	■ Among the very few source-available HLA RTI implementations ■ Recognized in the defense HLA community.
PARINO	Parallel/distributed branch-and-cut solver for mixed integer programming (MIP)	■ Incorporated novel cut sharing and distributed management mechanisms.

VIII. TEACHING

- **Faculty**, Georgia Institute of Technology, Summer 2003: Taught *Advanced Operating Systems* (CS4210) to senior-undergraduate and graduate computer science students.
- Georgia Tech end-of-course student evaluations for this course:

Question	Rating (0-5)
1. COURSE SEEMED WELL PLANNED AND ORGANIZED	4.0
2. GOOD JOB COVERING COURSE OBJECTIVES/CONTENT	4.0
3. EXPLAINED COMPLEX MATERIAL CLEARLY	4.7
4. WAS APPROACHABLE AND WILLING TO ASSIST	4.9
5. ENCOURAGED STUDENTS TO CONSULT WITH HIM/HER	4.8
6. CLASS ATTENDANCE IMPORTANT IN PROMOTING LEARNING	4.7
7. NUMBER OF ASSIGNMENTS WAS REASONABLE	4.1
8. EXAMS COVERED COURSE CONTENT/OBJECTIVES	4.2
9. EXAMS WERE OF APPROPRIATE DIFFICULTY	4.0
10. THE INSTRUCTOR WAS AN EFFECTIVE TEACHER	4.7

- **Graduate Teaching Assistant**, Georgia Institute of Technology, Fall 1993–Fall 1994: Taught special section of an introductory course on computing; handled laboratory classes.
- **Instructor**, University of Central Florida, Spring 1992: Taught data structures and algorithms to junior computer science students.
- **Graduate Teaching Assistant**, University of Central Florida, Fall 1991: Handled laboratory classes for business majors on software tools such as databases, spreadsheets and word processors.

IX. MENTORING

A. Mentee Staff Members

- Pablo Moriano (Ph.D., Computer Science), 2020

- Olivera Kotevska (Ph.D., Computer Science), 2018-2020
- Philipp Andelfinger (Ph.D., Computer Science), 2019-2020
- Maksud Alam (Ph.D., Computer Science), 2016-2022
- Srikanth Yoginath (Ph.D., Computer Science), 2007-2020
- Sudip Seal (Ph.D., Computer Science; Ph.D., Physics), 2007-2020

B. Post-doc and Post-Masters

- Olivera Kotevska, (Ph.D, Computer Science), Oak Ridge National Laboratory, Feb '19-Mar '20:
 - Supervisor and post-doctoral advisor to Dr. Kotevska on cyberphysical systems-related research projects
- Varisara Tansakul, (M.S., Industrial and Systems Engineering), Oak Ridge National Laboratory, May '18-Apr'19:
 - Supervisor to Ms. Tansakul on multiple projects
- Maksudul Alam, (Ph.D., Computer Science), Oak Ridge National Laboratory, Dec '16-Jul'22:
 - Supervisor and post-doctoral advisor to Dr. Alam on multiple projects
- Alfred Park, (Ph.D., Computer Science), Oak Ridge National Laboratory, Nov '10-Oct '12:
 - Supervisor and post-doctoral advisor to Dr. Park on multiple projects
- Sudip Seal, (Ph.D., Computer Science and Ph.D., Physics), Oak Ridge National Laboratory, Nov '07-Nov '09:
 - Supervisor and post-doctoral advisor to Dr. Seal on multiple projects
- Srikanth Yoginath (M.S., Computer Science), Georgia Institute of Technology and Oak Ridge National Laboratory, Jan '07-Jul '14
 - Supervisor to Dr. Yoginath as Group Leader, Project Manager, and Ph.D. Advisor

C. Students

1. Doctoral Thesis Advisor

- University of Tennessee, Knoxville (UTK) – Advisor for Aradhana Soni:
 - Aradhana Soni, 2021-2023 (PhD Candidate; Graduate Assistant, UTK)
Thesis Title: "Machine Learning for Early Detection of Defects in Commits to Software Repositories"
Thesis Committee: K. Perumalla (advisor), J. Ostrowski (co-advisor), A. Khojandi (member), K. Madduri (external member)
- University of Tennessee, Knoxville (UTK) – Advisor for Rupam Dey:
 - Rupam Dey, 2021-2023 (Graduate Assistant, UTK)
- Georgia Institute of Technology, Atlanta, GA – On-record thesis advisor for Dr. Yoginath:

- Srikanth Yoginath, 2007-2014 (Discrete Computing Systems, ORNL)
Thesis Title: “Virtual Time-Aware Virtual Machine Systems”
Thesis Committee: K. Perumalla (advisor), R. Fujimoto (co-advisor), U. Ramachandran, D. Bader, G. Riley

2. Doctoral Thesis Committee Member

- University of Nebraska-Lincoln (UNL):
 - Kimia Ameri, 2019-2023
 Thesis title “Cybersecurity Claim Classification” (Advisor: Prof. Hamid Sharif)
- University of Rome La-Sapienza, Rome, Italy:
 - Davide Cingolani, 2018
 Thesis title “Speculative Parallel Discrete Event Simulation” (Advisor: Prof. Francesco Quaglia)
- Virginia Polytechnic and State University (Virginia Tech):
 - Maksudul Alam, 2016
 Thesis title “Parallel Generation Techniques for Large Random Graphs” (Advisors: Profs. Maleq Khan and Madhav Marathe)
- Karlsruhe Institute of Technology, Karlsruhe, Germany:
 - Philipp Andelfinger, 2016
 Thesis title “Identifying and Harnessing Concurrency for Parallel and Distributed Network Simulation” (Advisor: Prof. Hannes Hartenstein)
- Georgia Institute of Technology, Atlanta, GA:
 - Dushmanta Mohapatra, 2015
 Thesis title “Coordinated Memory Management in Virtualized Environments” (Advisor: Prof. Kishore Ramachandran)
- EURECOM, Nice, France:
 - Bilel Rodhamme, 2013
 Thesis title “Simulation des Réseaux à grande Échelle sur les architectures de calculs hétérogènes”
- Georgia Institute of Technology, Atlanta, GA:
 - Alfred J. Park, 2009
 Thesis title “Master-Worker Parallel Discrete Event Simulation” (Advisor: Prof. Richard Fujimoto)

3. Interns

- Oak Ridge National Laboratory – direct supervisor/mentor for student interns:
 - Kingsley Nwosu (Virginia Tech), Summer 2021, “Machine Learning and Artificial Intelligence applied to Cyber-physical Systems” (**GEM Fellow**)

- Cora Chanel Richardson (Duke University, Tufts University), Summer 2020 (moved to 2021 due to COVID19), “Quantum Optimization and Reversible Computing applied to Electric Grid Resilience” (**GEM Fellow**)
- Alejandro Vega Nogales (Indiana University, University of Puerto Rico), Summer 2019, “Machine Learning Techniques applied to Cyber-Physical Systems” (**GEM Fellow**)
- Aakriti Upadhyay (State University of New York, Albany), Summer 2019, “Efficient Sparse Matrix Computations on Graphical Processing Units”
- James Fox (Georgia Institute of Technology), Summer 2018, “Community Detection-based Generation of Electric Distribution Network Graphs”
- Amin Nikakhtar (Texas Tech University), Summer 2018-Fall 2018, on doctoral thesis research proposal titled “Polynomial Optimization for Optimal Power Flow and Assured Generation”, competitively selected under the U.S. DOE Office of Science Graduate Student Research Program
- Till Koester (University of Rostock, Germany), Fall 2016-Spring 2017, “High-Performance Simulations of Cell Biology Models on Modern GPUs”
- Maksudul Alam (Virginia Tech), Spring 2016, “Computational Support for Cloning Simulations”
- Zhengchun Liu (U. Barcelona, Spain), Spring 2016, “High Performance Agent-based and Discrete Event Simulations”
- Maksudul Alam (Virginia Tech), Summer 2015, “Efficient Index Searching on Modern GPUs”
- Charles Elliott (CJ) Johnson (L&N STEM Academy), Summer 2015, “Message Passing Interface in JavaScript”
- Masatoshi Hanai (Tokyo Institute of Technology), 2015, “Exact-Differential Simulations” (mentored while at Durham University, UK)
- Melissa Yu (Farragut High School), Summer 2013, “Memory-Efficient Reversible Algorithms for Integer Square Root Computation”
- Matthew Street (Middle Tennessee State University), Summer 2010, “Visualizing Rollbacks in Parallel Discrete Event Simulations”
- Brandon Aaby (Maryville College), Summer 2008, “High Performance Hybrid Computing using Networks of Processors and GPGPUs”
- Clayton Thurmer (Oberlin University), Spring 2008, “Discrete Event Simulator Benchmarking”
- Brandon Aaby (Maryville College), Summer 2007, Fall 2007, “Social Science Simulations on GPGPUs”
- Patrick Wilkerson (Austin Peay State University), Summer 2007, “Parallel FDTD as Asynchronous Speculative Execution”
- John Wright (Mercer University), Summer 2007, “Reversibility of Computational Methods”
- Kathleen Abercrombie (Georgia Tech), Summer 2006, “Cut Selection in Sensor Network Optimization”
- Eric Beier (Texas A&M), Summer 2006, “Federated Optimization of Sensor Networks”

- Alfred Park (Georgia Tech), Summer 2006, “Integrated Analysis of Sensor Networks”
- Jason Roop (N. Carolina Central), Summer 2006, “Social Network Simulation using GPGPUs”

4. Other

- Georgia Institute of Technology – Special Topics (CS 8903) students:
 - Sivagowri Swaminathan, Summer 2005, “Incremental Mixed Integer Programming”
 - Ashok Babu Amara, Fall 2004, “Scalable Sensor Network Simulation”
 - Srikanth Sundargopalan, Fall 2003, “High-Fidelity Modeling of Computer Worms”
- Georgia Institute of Technology – Master’s thesis committee member:
 - Jagrut Dave, Fall 2004 – Spring 2005
- Georgia Institute of Technology – Supervised or advised six students and graduate research assistants, jointly with Dr. Richard Fujimoto

D. Contest Coaching

- **Programming Team Coach**, Georgia Institute of Technology 1994–2000
Coached the programming teams to top places in regional and international **ACM Intercollegiate Programming Contests**. Under my coaching:
 - Coached Georgia Tech to place in **top 5** in southeast region **4 times**.
 - Coached Georgia Tech to participate in **World Finals 3 times**.
- **Programming Team Member**, University of Central Florida 1991-1992
 - Placed **8th** in 1991 in ACM Southeast Regional Contest.
 - Placed **2nd** in 1992 in ACM Southeast Regional Contest.

X. RESEARCH COMMUNITY SERVICE

A. Professional Leadership

- **General Co-Chair**, International Conference on **Principles of Advanced Discrete Simulation (PADS)**, Atlanta, GA, 2022.
- **Program Chair**, International Conference on Cyber Warfare and Security (**ICCWS**), Cookeville, TN, 2020.
- **Guest Editor**, **Entropy Journal** Special Issue, “Entropy in Reversible Computing: Theoretical and Practical Extremities,” 2021.
- **Judge**, multiple venues over the years; recently on judging panel of doctoral consortium and poster judging teams at the **Tapia Conference** on Diversity in Computing 2018, 2019, 2020, 2021.
- **Track Chair**, Scientific Computing track, Winter Simulation Conference (**WSC**), Savannah, GA, 2014.
- **Program Chair**, International Conference on Simulation Tools and Techniques (**SimuTools**), Lison, Portugal, 2014.
- **Program Chair**, International Symposium on Modeling, Analysis and Simulation of Computer and Telecommunication Systems (**MASCOTS**), Washington, DC, 2012.

- **Guest Editor**, Special Issue on Best of PADS'07, SCS Transactions of the Society for Modeling and Simulation International (**SIMULATION journal**), 85(4), 2009.
- **Program Chair**, Symposium on Asynchronous Methods in Scientific and Mathematical Computing (**ASYM**), San Diego, CA, 2007.
- **Program Chair**, International Workshop on Principles of Advanced and Distributed Simulation (**PADS**), San Diego, CA 2007.

B. Organizational Leadership and Service

- **CS PI Meeting**: Organized a reconvening of the Computer Science Principal Investigator (PI) Meeting, March'25, Dallas-Fort Worth, Texas, with fellow program managers (Hal Finkel, Marco Fornari and Margaret Lentz) involving over 100 research staff from national labs and faculty members from universities serving as PIs on projects and programs funded in our advanced computing R&D portfolio. <https://www.ornl.gov/2025CSPI> .
- **CS PI Meeting**: Organized a renewed Computer Science Principal Investigator (PI) Meeting, Feb'24, Atlanta, Georgia. Orchestrated the whole event with fellow program managers (Hal Finkel and Margaret Lentz) bringing over 100 research staff from national labs and faculty members from universities serving as PIs on projects and programs funded in our advanced computing R&D portfolio. <https://www.ornl.gov/2024CSPI> .
- **ACM SIGSIM Chair**: Elected chair of the Association for Computing Machinery Special Interest Group in Simulation (www.acm.org/special-interest-groups/sig-governance) July 2020 - July 2024.
- **Team Lead, Creativity and Innovation Team**, Oak Ridge National Laboratory, Division-level team to investigate development of creativity and innovation in research and development, August-September 2015.

Led a team of 9 selected research staff assigned to analyze and make recommendations to top management on increasing scientific creativity and innovation in the Computational Sciences and Engineering division consisting of 150 research staff.

- **Seed Money Review Committee Voting Member**, Oak Ridge National Laboratory Director's Research and Development Funds for Strategic Development, 2006-2007.

Served on the institutional committee consisting of top scientists appointed by top management to evaluate and make recommendations on proposals from scientists across the entire laboratory for "seed projects" with futuristic scientific potential.

C. Professional Board Membership, Chairing, and Committees

- **Editorial Board Member** (Associate Editor), [Frontiers In Big Data Networks](#) (**FrontiersIn journal**) 2022-2023.
- **Editorial Board Member** (Associate Editor), ACM Transactions on Modeling and Computer Simulation (**TOMACS journal**) 2008-2023.
- **Editorial Board Member** (Associate Editor), European Operations Research Society Journal of Simulation (**Journal of Simulation**) 2021-2023.
- **Editorial Board Member** (Associate Editor), SCS Transactions of the Society for Modeling and Simulation International (**SIMULATION journal**) 2008-2023.

- **Program Committee Member** (partial list – not up to date – stopped tracking since 2014)
 - International Conference on Systems Simulation (**AsiaSim**) 2013, 2014.
 - ACM SIGSIM Conference on Principles of Advanced and Discrete Simulation (**PADS**) 2013.
 - IEEE/SCS/ACM International Workshop on Principles of Advanced and Distributed Simulation (**PADS**) continuously from 2003 to 2012.
 - International Symposium on Modeling, Analysis and Simulation of Computer and Telecommunication Systems (**MASCOTS**) 2001, 2005, 2010-13.
 - International Conference on Algorithms and Architectures for Parallel Processing (**ICA3PP**) 2012.
 - International Conference on Distributed Simulation and Real-time Applications (**DS-RT**) 2010-12.
 - International Conference on High Performance Computing and Communication (**HPCC**) 2012.
 - International Conference on Simulation Tools and Techniques (**SimuTools**) 2010-14.
 - International Conference on High Performance Computing, Storage and Networking (**Supercomputing**) 2008.
- **Steering Committee Member**, International Workshop on Principles of Advanced and Distributed Simulation (**PADS**) 2007-2011.

D. Reviewing (Partial List)

Served as reviewer for the several journals and conferences over many years.

List is **not up to date** (stopped tracking in 2014). The following is a **partial list** to illustrate some of the technical areas.

- Transactions of the Society for Modeling & Simulation Intl. (**SIMULATION**).
- Journal of Parallel and Distributed Computing (**JPDC**)
- Information Processing Letters (**IPL**)
- Interscience Wiley Journal on Software Practice & Experience (**SP&E**)
- IEEE Journal on Computer Communications (**CC**)
- IEEE Conference on Distributed Simulation & Real-time Applications (**DS-RT**)
- ACM Transactions on Modeling and Computer Simulation (**TOMACS**)
- ACM/IEEE Workshop on Parallel and Distributed Simulation (**PADS**)
- INFORMS Winter Simulation Conference (**WSC**)
- IEEE Transactions on Parallel and Distributed Systems (**TPDS**)
- IEEE Conference on Computer Communications (**INFOCOM**).

XI. PUBLICATIONS

A. H-Index and G-Index

- **H-index:** 34 (Google Scholar, as of April 2026)
- **I10-index:** 78 (Google Scholar, as of April 2026)
- **Citations:** 4248 (Google Scholar, as of April 2026)

B. Books

1. Kalyan Perumalla, "Introduction to Reversible Computing," *Computational Science Series*, Chapman & Hall/CRC Press, ISBN 978-143-9873-40-3, 325 pages, 2013.
www.crcpress.com/product/isbn/9781439873403
2. (Monograph) Richard Fujimoto, Kalyan Perumalla and George Riley, "Network Simulation," *Synthesis Lectures on Communication Networks* (Jean Walrand, Editor), *Morgan & Claypool Publishers*, ISBN 1598291106, 2006.
www.morganclaypool.com/page/lectures/lectureList.jsp

C. Book Chapters

1. Kalyan Perumalla, "Computational Spectrum of Agent Model Simulation," in *Modelling, Simulation and Optimization*, *IN TECH Publishers*, ISBN 978-953-7619-36-7, published April 2010.
2. Kalyan Perumalla, "Model Execution," in *CRC Handbook of Dynamic System Modeling* (Paul Fishwick, Editor), ISBN 1584885653, 2007.
3. Homa Karimabadi, Yuri Omelchenko, Jonathan Driscoll, Richard Fujimoto and Kalyan Perumalla, "A New Methodology for Multi-Scale Simulation of Plasmas," in *Lecture Book on Advanced Methods for Space Engineering*, January 2007.

D. Funding Solicitations Authored or Co-Authored

1. **LAB-25-3510**: Scientific Discovery through Advanced Computing (SciDAC) Institutes
 - <https://science.osti.gov/-/media/grants/pdf/lab-announcements/2025/LAB-25-3510-000003.pdf>
 - **\$75 million** in total funding subject to congressional appropriations
2. **LAB-25-3530**: National Quantum Information Science Research Centers
 - <https://science.osti.gov/-/media/grants/pdf/lab-announcements/2025/LAB-25-3530-000002.pdf>
 - **\$625 million** in total funding subject to congressional appropriations
3. **LAB-25-3520**: Competitive Portfolios for Advanced Scientific Computing Research
 - <https://science.osti.gov/-/media/grants/pdf/lab-announcements/2025/LAB-25-3520-000002.pdf>
 - **\$35 million** in total funding subject to congressional appropriations
4. **DE-FOA-0003545**: EXPRESS – Exploratory Research for Extreme-Scale Science Program
 - <https://science.osti.gov/-/media/grants/pdf/foas/2025/DE-FOA-0003545-000001.pdf>
 - **\$16 million** in total funding subject to congressional appropriations
5. **DE-FOA-0003450**: Early Career Research Program
 - <https://science.osti.gov/-/media/grants/pdf/foas/2025/DE-FOA-0003450-000003.pdf>
 - **\$136 million** in total funding subject to congressional appropriations
6. **DE-FOA-0003432**: Continuation of Solicitation for the Office of Science Financial Assistance
 - Press Release: <https://www.energy.gov/science/articles/departments-energy-announces-500-million-basic-research-advance-frontiers-science-0>
 - Funding Opportunity: <https://science.osti.gov/-/media/grants/pdf/foas/2024/DE-FOA-0003432.pdf>
 - **\$500 million** across eight Office of Science Programs, subject to congressional appropriations
7. **DE-FOA-0003264**: Advancements in Artificial Intelligence for Science (AI for Science)

- Press Release: <https://www.energy.gov/science/articles/departments-energy-announces-68-million-funding-artificial-intelligence-scientific>
 - Award List: <https://science.osti.gov/-/media/funding/pdf/Awards-Lists/2024/3264-AI-for-SCIENCE-Awards-List-spreadsheet-sorted-BY-PROJECT.pdf>
 - Funding Opportunity: <https://science.osti.gov/-/media/grants/pdf/foas/2024/DE-FOA-0003264-000001.pdf>
 - **\$68 million** in funding for 11 multi-institution projects, comprising 43 awards
8. **LAB-24-3210: Competitive Portfolios for Advanced Scientific Computing Research**
 - Press Release: <https://www.energy.gov/science/articles/office-science-selections-funding-opportunity-announcements-week-september-25-2024>
 - Award List: https://science.osti.gov/-/media/funding/pdf/Awards-Lists/2024/3210---CompPort-Awards-List---FY24-CF_Updated.pdf
 - Lab Funding Opportunity: <https://science.osti.gov/-/media/grants/pdf/lab-announcements/2024/LAB-24-3210.pdf>
 - **\$87 million** in funding for 9 awards
 9. **DE-FOA-0003280: Reaching a New Energy Sciences Workforce (RENEW)**
 - Press Release: <https://www.energy.gov/science/articles/departments-energy-announces-36-million-student-traineeships>
 - Award List: <https://science.osti.gov/-/media/funding/pdf/Awards-Lists/2024/3280-RENEW-Selections-List-1.pdf>
 - Funding Opportunity: <https://science.osti.gov/-/media/grants/pdf/foas/2024/DE-FOA-0003280.pdf>
 - **\$36 million** in funding for 29 projects to 42 institutions in 16 states
 10. **DE-FOA-0003300: Exploratory Research for Extreme-Scale Science (EXPRESS)**
 - Press Release: <https://www.energy.gov/science/articles/office-science-selections-funding-opportunity-announcements-foas-week-august-14>
 - Award List: <https://science.osti.gov/-/media/funding/pdf/Awards-Lists/2024/AwardsList-EXPRESS-2024.pdf>
 - Funding Opportunity: <https://science.osti.gov/ascr/-/media/grants/pdf/foas/2024/DE-FOA-0003300.pdf>
 - **\$10.8 million** in funding for 19 projects
 11. **LAB-23-3040: Scientific Enablers of Scalable Quantum Communications**
 - Press Release: <https://www.energy.gov/science/articles/departments-energy-announces-24-million-research-quantum-networks>
 - Award List: <https://science.osti.gov/-/media/funding/pdf/Awards-Lists/3040-ASCR-Quantum-Networks-Awards-List.pdf>
 - Lab Funding Opportunity: https://science.osti.gov/-/media/grants/pdf/lab-announcements/2023/LAB_23-3040.pdf
 - **\$24 million** in funding for 3 projects

10. Kalyan Perumalla, "High-Performance Simulations for Capturing Feedback and Fidelity in Complex Networked Systems," in SIAM Conference on Parallel Processing for Scientific Computing (PP10), Seattle, Washington, February 2010.

11. Kalyan Perumalla, Brandon Aaby, Srikanth Yoginath and Sudip Seal, "Towards Highly Interactive, GPU-based Evaluation of Evacuation Transport Scenarios at State-Scale," National Evacuation Conference, February 2010.
12. Kalyan Perumalla, "Cyber Security Experimentation: Gory Detail or None at All?" in SIAM Annual Meeting (AN), Denver, Colorado, July 2009.
13. Kalyan Perumalla, Richard Fujimoto, Santosh Pande, Homa Karimabadi, Jonathan Driscoll and Yuri Omelchenko, "Virtual Simulator: An Infrastructure for Design and Performance-Prediction of Massively Parallel Codes," in American Geophysical Union Fall Meeting (GU), San Francisco, California, December 2005.

I. Abstracts with Posters

1. Aradhana Soni and Kalyan Perumalla, "Towards Machine Learning-based Early Detection of Defective Commits to Software Repositories," IEEE Secure Development Conference (SecDev), October 2022.
2. Slaven Peles, Cosmin Petra, Shrirang Abhyankar, Michel Schanen, Mihai Anitescu, Kalyan Perumalla, Mathew Reynolds, and William Jones, "ExaSGD: Power Grid Optimization at Exascale," Exascale Computing Project Annual Meeting, April 2021.
3. Sudip Seal, Steven Hirshman and Kalyan Perumalla, "Scaling Optimization of the SIESTA MHD Code," abstract and poster at the 55th Annual Meeting of the American Physical Society, Division of Plasma Physics, Denver, CO, November 2013.
4. Kalyan Perumalla, "ReveR-SES: Reversible Software for Exascale," abstract and poster at Department of Energy Exascale PI Meeting, Arlington, VA, October 2012.
5. Sudip Seal, Kalyan Perumalla and Steven Hirshman, "Improved Parallelization of the SIESTA Magneto-hydrodynamic Equilibrium Code Using Cyclic Reduction," abstract and poster at the 53rd Annual Meeting of the American Physical Society, Division of Plasma Physics, Salt Lake City, Utah, November 2011.
6. Brandon Aaby and Kalyan Perumalla, "A Case Study of Efficient Social Network Simulation through General Processing on Graphics Processing Units (GPGPUs)," Journal of Undergraduate Research of the Department of Energy, October 2008.
7. Patrick Wilkerson and Kalyan Perumalla, "A Case Study of the Performance of Speculative Asynchronous Simulation on Parallel Computers," Journal of Undergraduate Research of the Department of Energy, October 2008.
8. John Wright and Kalyan Perumalla, "Two Case Studies in Reversibility of Computational Methods," Journal of Undergraduate Research of the Department of Energy, October 2008.

J. Peer-reviewed Conference Papers

1. Matthew Boeding, Michael Hempel, Hamid Sharif, Juan Lopez, and Kalyan Perumalla, "A Testbed for Evaluating the Performance and Cybersecurity Implications of IEC-61850 GOOSE Hardware Implementations," in Proceedings of the 20th IEEE Consumer Communications and Networking Conference (CCNC), January 2023.
2. Rupam Kumar Dey, Anahita Khojandi, and Kalyan Perumalla, "Determining the most Significant Metadata Features to Indicate Defective Software Commits," in Proceedings of the 21st IEEE/ACIS

International Conference on Software Engineering Research, Management and Applications (SERA), Orlando, FL, May 2023.

3. Kimia Ameri, Michael Hempel, Hamid Sharif, Juan Lopez, and Kalyan Perumalla, "Impact of Grammar on Language Model Comprehension," in Proceedings of the 10th International Conference on Computing, Networking and Communications, Honolulu, Hawaii, February 2023.
4. Aradhana Soni, Kalyan Perumalla and Xueping Li, "Extending the Naming Game in Social Networks to Multiple Hearers per Speaker," in Proceedings of the 55th Winter Simulation Conference, Singapore, December 2022.
5. James Nutaro, Suman Debnath and Kalyan Perumalla, "A Case Study in Simulation Methods for Power Electronic Circuits," in Proceedings of the International SCS Annual Simulation Conference, Fairfax, VA, July 2021.
6. Kimia Ameri, Michael Hempel, Hamid Sharif, Juan Lopez, and Kalyan Perumalla, "Smart Semi-Supervised Accumulation of Large Repositories for Industrial Control Systems Device Information," in Proceedings of the 16th International Conference on Cyber Warfare and Security, February 2021.
7. Kalyan Perumalla, Juan Lopez, Maksudul Alam, Olivera Kotevska, Michael Hempel, and Hamid Sharif, "CYVET: A Novel Vetting Approach to Cybersecurity Verification in Energy Grid Systems," in Proceedings of the IEEE Kansas Power and Energy Conference (KPEC), Manhattan, KS, July 2020.
8. Olivera Kotevska, Kuldeep Kurte, Jeffrey Munk, Travis Johnston, Evan McKee, Kalyan Perumalla, and Helia Zandi, "RL-HEMS: Reinforcement Learning Based Home Energy Management System for HVAC Energy Optimization," ASHRAE Winter Conference, February 2020.
9. Kalyan Perumalla, Srikanth Yoginath and Juan Lopez, "Deep CYBERIA: Detecting Sensors and Inferring their Relations at Level-0 in Industrial Cyber-Physical Systems," in Proceedings of the IEEE International Symposium on Technologies for Homeland Security (IEEE HST), Boston, MA, November 2019.
10. Srikanth Yoginath, Maksudul Alam, Kalyan Perumalla, "Energy Conservation Through Cloned Execution of Simulations," in Proceedings of the Winter Simulation Conference (WSC), December 2019.
11. Olivera Kotevska, Kuldeep Kurte, Jefferey Munk, Travis Johnston, Evan McKee, Kalyan Perumalla, and Helia Zandi, "RL-HEMS: Reinforcement Learning-based Home Energy Management System for HVAC Energy Optimization," in Proceedings of the ASHRAE Winter Conference, Orlando, FL, February 2020.
12. Olivera Kotevska, Kalyan Perumalla, and Juan Lopez, "Kensor: Coordinated Intelligence with Co-located Sensors," in Proceedings of the IEEE International Conference on Big Data (BigData), Los Angeles, CA, December 2019.
13. Srikanth Yoginath, Varisara Tansakul, Supriya Chinthavali, Curtis Taylor, Joshua Hambrick, Philip Irminger, Kalyan S. Perumalla, "On the Effectiveness of Recurrent Neural Networks for Live Modeling of Cyber-Physical Systems," in Proceedings of the IEEE International Conference on Industrial Internet (ICII), Orlando, FL, November 2019.
14. Srikanth Yoginath, Maksudul Alam, Aravind Ramanathan, Debsindhu Bhowmik, Nouamane Laanait and Kalyan Perumalla, "Towards Native Execution of Deep Learning on a Leadership-Class HPC System," in Proceedings of the Workshop on Scalable Deep Learning over Parallel and

Distributed Infrastructures, International Parallel and Distributed Processing Symposium (IPDPS), May 2019.

15. Juan Lopez, Ryan Kerekes, Kalyan Perumalla, Mark Buckner, "Digital-Twin Development Framework for Quantitative Assessment of Power Grid Cyber-Resilience," in Proceedings of the IEEE SoutheastCon, Orlando, FL, April 2018.
16. Srikanth Yoginath and Kalyan Perumalla, "Efficient Reversible Uniform and Non-Uniform Random Number Generation in UNU.RAN," in Proceedings of the Spring Simulation Multi-Conference (SpringSim), April 2018.
17. Maksudul Alam and Kalyan Perumalla, "GPU-based Parallel Algorithm for Generating Massive Scale-free Networks using the Preferential Attachment Model," in Proceedings of the BigGraphs Workshop at the IEEE BigData Conference (IEEE BigGraphs), December 2017.
18. Till Köster, Kalyan Perumalla, Adelinde M. Uhrmacher, "Efficient Simulation of Nested Hollow Sphere Intersections: for Dynamically Nested Compartmental Models in Cell Biology," in Proceedings of the ACM International Conference on Principles of Advanced Discrete Simulation (SIGSIM-PADS), May 2017.
19. Maksudul Alam, Srikanth Yoginath and Kalyan Perumalla, "Performance of Point and Range Queries for In-Memory Databases using Radix Trees on GPUs," in Proceedings of the International Conference on High Performance Computing and Communication, December 2016.
20. Kalyan Perumalla, Mohammed Olama and Srikanth Yoginath, "Model-based Dynamic Control of Speculative Forays in Parallel Computation," in Proceedings of the International Workshop on Practical Applications of Stochastic Modeling, April 2016.
21. S. Dinesh Kumar, Himanshu Thapliyal, Azhar Mohammad, Vijay Singh, Kalyan Perumalla, "Energy-Efficient and Secure S-Box Circuit Using Symmetric Pass Gate Adiabatic Logic," in Proceedings of the International Symposium on Very Large Scale Integrated Circuits (ISVLSI), 2016.
22. Masatoshi Hanai, Toyotaro Suzumura, Georgios Theodoropoulos, Kalyan Perumalla, "Exact-Differential Large-Scale Traffic Simulation," in Proceedings of the ACM Conference on Principles of Advanced Discrete Simulation (SIGSIM-PADS), June 2015.
23. Kalyan Perumalla and Alfred Park, "Simulating Billion-Task Parallel Programs," in Proceedings of International Symposium on Performance Evaluation of Computer and Telecommunication Systems (SPECTS), Monterey, CA, July 2014 [**Best Paper Award**].
24. Srikanth Yoginath and Kalyan Perumalla, "Empirical Evaluation of PDES Execution on Cloud and Virtual Machine Platforms," in Proceedings of ACM SIGSIM Conference on Principles of Advanced Discrete Simulation (PADS), Montreal, Canada, May 2013.
25. Srikanth Yoginath and Kalyan Perumalla, "Optimized Hypervisor Scheduler for Parallel Discrete Event Simulations on Virtual Machine Platforms," in Proceedings of ICST International Conference on Simulation Tools and Techniques (SimuTools), Cannes, France, March 2013.
26. Srikanth Yoginath, Kalyan Perumalla and Brian Henz, "Taming Wild Horses: The Need for Virtual Time-based Scheduling of VMs in Network Simulations," in Proceedings of International Symposium on Modeling, Analysis and Simulation of Computer and Telecommunication Systems (MASCOTS), Washington, DC, August 2012.

27. Kalyan Perumalla, Alfred Park and Vinod Tipparaju, "GVT Algorithms and Discrete Event Dynamics on 129K+ Processor Cores," in Proceedings of International Conference on High Performance Computing (HiPC), Bangalore, India, December 2011.
28. Kalyan Perumalla and Alfred Park, "Improving Multi-Million Virtual Rank MPI Execution in $\mu\pi$," in Proceedings of International Symposium on Modeling and Simulation of Computing and Telecommunication Systems (MASCOTS), Singapore, July 2011.
29. Kalyan Perumalla, James Nutaro and Srikanth Yoginath, "Towards High Performance Discrete Event Simulations of Smart Electric Grids," in Proceedings of International Workshop on High Performance Computing, Networking and Analytics for the Power Grid (HiPCNAG), Seattle, Washington, November 2011.
30. Srikanth Yoginath and Kalyan Perumalla, "Efficiently Scheduling Multi-core Guest Virtual Machines on Multi-core Hosts in Network Simulation," in Proceedings of International Workshop on Principles of Advanced and Distributed Simulation (PADS), Nice, France, July 2011. [**Best Paper Finalist**]
31. Christopher Carothers and Kalyan Perumalla, "On Deciding between Conservative and Optimistic Approaches on Massively Parallel Platforms," in Proceedings of Winter Simulation Conference (WSC), Washington, DC, December 2010.
32. Kalyan Perumalla and Sudip Seal, "Reversible Parallel Discrete-Event Execution of Large-scale Epidemic Outbreak Models," in Proceedings of International Workshop on Principles of Advanced and Distributed Simulation (PADS), Atlanta, Georgia, May 2010. [**Best Paper Finalist**]
33. Kalyan Perumalla, " $\mu\pi$: A Scalable and Transparent System for Simulating MPI Programs," in Proceedings of ICST International Conference on Simulation Tools and Techniques (SimuTools), Malaga, Spain, March 2010.
34. Brandon Aaby, Kalyan Perumalla and Sudip Seal, "Efficient Simulations of Agent-Based Models on Multi-GPU and Multi-Core Clusters," in Proceedings of ICST International Conference on Simulation Tools and Techniques (SimuTools), Malaga, Spain, March 2010. [**Best Paper Finalist**]
35. Sudip Seal and Kalyan Perumalla, "Scalable Parallel Execution of an Event-based Radio Signal Propagation Model for Cluttered 3D Terrains," in Proceedings of International Conference on Parallel Processing, Vienna, Austria, September 2009.
36. Kalyan Perumalla and Jack Schryver, "A Connectionist Modeling Approach to Rapid Analysis of Emergent Social Cognition Properties in Large-Populations," in Proceedings of Human Behavior-Computational Modeling and Interoperability Conference, Oak Ridge, Tennessee, June 2009.
37. Kalyan Perumalla, "Efficient Execution on GPUs of Field-based Vehicular Mobility Models," in Proceedings of International Workshop on Principles of Advanced and Distributed Simulation, Lake Placid, New York, June 2009.
38. Richard Mills, Forrest Hoffman, Patrick Worley, Kalyan Perumalla, Art Mirin, Glenn Hammond and Barry Smith, "Coping at the User-Level with Resource Limitations in the Cray Message Passing Toolkit MPI at Scale: How Not to Spend Your Summer Vacation," in Proceedings of Cray User Group Meeting, Atlanta, Georgia, May 2009.
39. Srikanth Yoginath and Kalyan Perumalla, "Parallel Vehicular Traffic Simulations using Reverse Computation-based Optimistic Execution," in Proceedings of International Workshop on Principles of Advanced and Distributed Simulation, Rome, Italy, June 2008.

40. Kalyan Perumalla and Brandon Aaby, "Data Parallel Execution Challenges and Runtime Performance of Agent Simulations on GPUs," in Proceedings of Spring Computer Simulation Conference, Ottawa, Canada, April 2008. [**Best Paper Award**]
41. Kalyan Perumalla and Martin Beckerman, "An Analysis Approach to Large-Scale Vehicular Network Simulations," in Proceedings of Summer Computer Simulation Conference, San Diego, California, June 2007.
42. Kalyan Perumalla, "Scaling Time Warp-based Discrete Event Execution to 10^4 Processors on a Blue Gene Supercomputer," in Proceedings of ACM Computing Frontiers, Ischia, Italy, May 2007.
43. Kalyan Perumalla, "A Systems Approach to Scalable Transportation Network Modeling," in Proceedings of Winter Simulation Conference (WSC), Monterey, California, December 2006.
44. Kalyan S. Perumalla, "On Accounting for the Interplay of Kinetic and Non-Kinetic Aspects of Population Mobility Models," in Proceedings of European Modeling and Simulation Symposium (EMSS), Barcelona, Spain, October 2006.

XII. TECHNICAL TALKS

A. Distinguished Lectures, Keynotes, Invited Talks and Seminars

- "Weathering the AI, Quantum, and other Tsunamis Hitting the Shores of Modeling and Simulation," Invited *Titan of Simulation Keynote Talk*, Winter Simulation Conference (WSC), <https://meetings.informs.org/wordpress/wsc2026/keynotes/>, December 2026.
- "Continuum Computing: The Quantum Edge," International Conference on Computing, Networking, Storage and Analysis (Supercomputing'24), <https://sc24.conference-program.com/presentation/?id=bof188&sess=sess647>, November 2024.
- "Research Opportunities in Simulation and Artificial Intelligence (AI)," Invited Keynote Talk, ACM International Conference on Principles of Advanced Discrete Simulation (PADS), <https://sigsim.acm.org/conf/pads/2023/speaker/kalyan-perumalla/>, June 2023.
- "On Some Confluences of Computing and Security in Theory and Practice," National Security Sciences Directorate Geek Brief Seminar Series, Oak Ridge National Laboratory, May 2021.
- "Trust-but-Verify in Cyber-Physical Systems," Invited Keynote Talk, ACM Workshop on Secure and Trustworthy Cyber-Physical Systems, <https://sites.google.com/view/sat-cps-2021/>, April 2021.
- "Research and Development Needs for Digital Twins," Featured speaker at the NSF Digital Twins Workforce Development Workshop, University of Tennessee, Chattanooga, December 2020.
- Invited participation at the Dagstuhl Seminar "Computer Science Methods for Effective and Sustainable Simulation Studies," Schloss Dagstuhl – Leibniz Center for Informatics, Dagstuhl, Germany, www.dagstuhl.de/20461, November 2020.
- "Towards Enabling GPU-Accelerated Massively Parallel Mixed Integer Programming," Department of Industrial and Systems Engineering, University of Tennessee, Knoxville, TN, November 2018.
- "Effective Exascale Computing using Computational Cloning," Distinguished Lecture Series Talk, Michigan Technological University, MI, April 2017.

- “Theoretical and Practical Relations between Low Energy Computation and Reversible Computing Software,” Invited Keynote Talk, IEEE International Symposium on Nano-electronic Information Systems (IEEE-INIS), www.ieee-inis.org, India, December 2016.
- “On Enabling and Exploiting Reversibility in Large-scale High-Performance Computing,” Innovative Computing Laboratory, University of Tennessee, Knoxville, TN, December 2015.
- “Reversible Software Execution Systems,” DOE Advanced Scientific Computing Research Advisory Board, Washington, DC, December 2015.
- “From Desktops to Supercomputers: The Wide Computational Spectrum in Simulating Emergence,” Invited Public Lecture, Durham University, Durham, UK, March 2015.
- “Intersections of Emergence with Reversibility and Simulation,” Institute of Advanced Study, Durham University, Durham, UK, February 2015.
- “Computational Challenges in the Design of Secure Smart Electric Grids of the Future,” Durham University, Durham, UK, February 2015.
- “Reversible Computing: Revisiting and Revising Certain Critical Assumptions in Serial and Parallel Computing,” University of Kentucky, Lexington, Kentucky, December 2014.
- “Reversible Computing Software for Large-scale Parallel Execution,” Distinguished Lecture, Florida International University, Miami, FL, November 2013.
- “ReveR-SES: Reversible Software Execution Systems,” (plenary) DOE Exascale Computing PI Meeting, Washington, DC, October 2012.
- “ReveR-SES: Reversible Software Execution Systems,” DOE Advanced Scientific Computing Research Advisory Board, Washington, DC, November 2011.
- “Supercomputing Applications of the other Kind: Real-time Parallel Discrete Event Simulations of Large, Smart Infrastructures,” IBM T. J. Watson Research Center, York Town, New York, July 2010.
- “Switching to High Gear: Opportunities for Grand-scale Real-time Parallel Simulations,” Invited Keynote at the IEEE/ACM Distributed Simulations and Real-time Applications (DS-RT), Singapore, October 2009.
- “High Performance Computing-based Experimentation for Cyber Infrastructure and Security,” Lawrence Livermore National Laboratory, Livermore, California, July 2008.
- “Feasibility, Efficiency and Limits of Compiler-based Automation for Reversibility of Codes,” Lawrence Livermore National Laboratory, Livermore, California, July 2008.
- “Application-Level Asynchronous Speculative Execution,” IBM T.J.Watson Research Center, York Town, New York, September 2007.
- “Computational Tools for Efficient Large-scale Discrete-Event Models,” Oak Ridge National Laboratory, Oak Ridge, Tennessee, May 2005.
- “Computational Methods for Efficient Large-scale System Models,” Indiana University Purdue University, Indianapolis, Indiana, March 2005.
- “Achieving Interoperability and Scalability in Simulation of Networks,” University of Louisville, Louisville, Kentucky, February 2003.

- “Using Reverse Computation towards Efficient Parallel/Distributed Computation,” Bell Labs, Lucent Technologies, Murray Hill, New Jersey, May 2000.
- “Using Reverse Computation towards Efficient Parallel/Distributed Computation,” IBM T. J. Watson Research Center, York Town, New York, April 2000.
- “Using Reverse Computation towards Efficient Parallel/Distributed Computation,” Purdue University, Lafayette, Indiana, April 2000.
- “Using Reverse Computation towards Efficient Parallel/Distributed Computation,” University of Arizona, Tucson, Arizona, April 2000.
- “Using Reverse Computation towards Efficient Parallel/Distributed Computation,” University of Central Florida, Orlando, Florida, April 2000.
- “Towards Reusable Modeling and Parallel Simulation of Telecommunication Networks,” Bell Labs, Lucent Technologies, Murray Hill, New Jersey, February 1998.
- “Reusable Modeling and Parallel Simulation of Networks using the TeD Language,” WINLAB, Rutgers University, Piscataway, New Jersey, January 1997.

B. Tutorials

1. “Reversible Programming Paradigms and Models,” Tutorial, International Conference on Reversible Computation (RC), Kolkata, India, July 2017.
2. “Parallel Discrete Event Simulation,” Tutorial, International Conference on High Performance Computing and Simulation (HPCS), Bologna, Italy, July 2014.
3. “Introduction to Reversible Computing,” Tutorial, International Conference on High Performance Computing and Simulation (HPCS), Bologna, Italy, July 2014.
4. “Parallel Discrete Event Simulation using Supercomputers, Cloud/VMs, and Accelerators,” Tutorial, ACM SIGSIM Principles of Advanced Discrete Simulation (PADS), Denver, CO, May 2014.
5. “Parallel Simulation on Supercomputers,” Tutorial, Winter Simulation Conference (WSC), Berlin, Germany, December 2012.
6. “Introduction to Simulation on GPUs,” Tutorial, IEEE/ACM International Symposium on Distributed Simulations and Real-time Applications (DS-RT), Singapore, October 2009.
7. “Agent-based Simulations using GPUs,” Tutorial, IEEE/ACM/SCS Principles of Advanced and Distributed Simulation (PADS), Lake Placid, NY, June 2009.
8. “Handling Time Management under the HLA,” Tutorial, Interservice/Industry Training, Simulation and Education Conference (I/ITSEC), Orlando, Florida, December 2007.
9. “Parallel and Distributed Simulation: Traditional Techniques and Recent Advances,” Tutorial, IEEE/ACM/SCS Principles of Advanced and Distributed Simulation (PADS), San Diego, California, June 2007.
10. “Parallel and Distributed Simulation: Traditional Techniques and Recent Advances,” Tutorial, Winter Simulation Conference (WSC), Monterey, California, December 2006.
11. “Handling Time Management under the HLA,” Tutorial, Interservice/Industry Training, Simulation and Education Conference (I/ITSEC), Orlando, Florida, December 2006.

12. “Distributed Simulation Systems & the High Level Architecture (HLA),” Tutorial, Interservice/Industry Training, Simulation and Education Conference (I/ITSEC), Orlando, Florida, December 2005.
13. “Distributed Simulation Systems & the High Level Architecture (HLA),” Tutorial, Interservice/Industry Training, Simulation and Education Conference (I/ITSEC), Orlando, Florida, December 2004. [*Presented to over 115 attendees from industry, government & military*].
14. “The High Level Architecture for Simulation,” Tutorial, ACM/IEEE/SCS Workshop on Parallel and Distributed Simulation, Atlanta, Georgia, May 1999 (co-presented with R. Fujimoto, K. Morse and R. Weatherly).

XIII. OTHER DATA

A. Citizenship and Security Clearance

- **Citizenship:** USA
- **Clearance:** DOE Q (Top Secret) Clearance (2014-2022)

B. Erdős Number

- Three (3) – in two ways:

Paul Erdős » (Frank Harrary » Narsingh Deo) | (Fan Chung » Sandeep Bhatt) » Kalyan Perumalla

C. Online Profiles
